Interface Language: English + Russian Hardware: Present Description: DynEQ is a set of programs that allows you to Get sound in real time from any program that has a VST-synthesis plugin. And also create your own plugins (sample), like Steinberg does, with only a small set of tools. The DynEQ package consists of two parts - the DAW program Sound Normalizer and the VST plugin DynEQ. Sound Normalizer is a volume normalizer utility designed for musicians, sound engineers and anyone who needs to adjust the volume level on their computer. The program is very easy to use and has a clear interface, and includes multi-language support, including Russian. With this application you can quickly and easily normalize the volume of any audio file by simply dragging, clicking on the application icon in the window of any program, and then dragging the icon to the window of the program in which the audio file is currently displayed. DynEQ DAW software is a plug-in designed to make studio work easier and faster. DynEQ allows you to: Instantly adjust the volume level of the sound in a MIDI file. Quickly and easily adjust the sound volume level in multiple audio grooves. Adjust the sound level in a MIDI file with a single button. Instantly switch channels of a MIDI track.
